

## **Precision BioSciences to Report Second Quarter 2025 Results on August 7, 2025**

August 4, 2025 at 7:01 AM EDT

DURHAM, N.C.--(BUSINESS WIRE)--Aug. 4, 2025-- Precision BioSciences, Inc. (Nasdaq: DTIL), a clinical stage gene editing company utilizing its novel proprietary ARCUS<sup>®</sup> platform to develop *in vivo* gene editing therapies for diseases with high unmet need, today announced that it will publish financial results for the second quarter 2025 and provide a business update on August 7, 2025.

### **About Precision BioSciences, Inc.**

Precision BioSciences, Inc. is a clinical stage gene editing company dedicated to improving life (DTIL) with its novel and proprietary ARCUS<sup>®</sup> genome editing platform that differs from other technologies in the way it cuts, its smaller size, and its simpler structure. Key capabilities and differentiating characteristics may enable ARCUS nucleases to drive more intended, defined therapeutic outcomes. Using ARCUS, the Company's pipeline is comprised of *in vivo* gene editing candidates designed to deliver lasting cures for the broadest range of genetic and infectious diseases where no adequate treatments exist. For more information about Precision BioSciences, please visit [www.precisionbiosciences.com](http://www.precisionbiosciences.com).

The ARCUS<sup>®</sup> platform is being used to develop *in vivo* gene editing therapies for sophisticated gene edits, including gene insertion (inserting DNA into gene to cause expression/add function), elimination (removing a genome e.g. viral DNA such as in the HBV program), and excision (removing a large portion of a defective gene by delivering two ARCUS nucleases in a single AAV such as in the DMD program).
