Precision BioSciences to Report Fourth Quarter and Fiscal Year 2025 Results on March 12, 2026

March 9, 2026 at 4:15 PM EDT

DURHAM, N.C.--(BUSINESS WIRE)--Mar. 9, 2026-- Precision BioSciences, Inc. (Nasdaq: DTIL), a clinical stage gene editing company utilizing its novel proprietary ARCUS® platform to develop *in vivo* gene editing therapies for high unmet need diseases, today announced that it will publish financial results for the fourth quarter 2025 and provide a business update on March 12, 2026.

About Precision BioSciences, Inc.

Precision BioSciences, Inc. is a clinical stage gene editing company dedicated to improving life (DTIL) with its novel and proprietary ARCUS® genome editing platform that differs from other gene editing technologies in the way it cuts, its smaller size, and its simpler structure. These features are intended for ARCUS nucleases to drive more defined therapeutic outcomes. Using ARCUS, the Company's pipeline is comprised of clinical stage *in vivo* gene editing candidates designed to deliver lasting cures for the broadest range of genetic and infectious diseases where no adequate treatments exist. For more information about Precision BioSciences, please visit **www.precisionbiosciences.com**.

The ARCUS® platform is being used to develop *in vivo* gene editing therapies for sophisticated gene edits, including, elimination (removing a genome e.g. viral DNA such as in the Company's PBGENE-HBV program), excision (removing a large portion of a defective gene by delivering two ARCUS nucleases in a single AAV such as in the Company's DMD program) and gene insertion (inserting DNA into gene to cause expression/add function).
