

## Precision BioSciences to Report First Quarter 2026 Financial Results on May 5, 2026

April 30, 2026 at 7:01 AM EDT

DURHAM, N.C.--(BUSINESS WIRE)--Apr. 30, 2026-- Precision BioSciences, Inc. (Nasdaq: DTIL), a clinical stage gene editing company utilizing its novel proprietary ARCUS<sup>®</sup> platform to develop *in vivo* gene editing therapies for high unmet need diseases, today announced that it will publish financial results for the first quarter 2026 and provide a business update on May 5, 2026.

### About Precision BioSciences, Inc.

Precision BioSciences, Inc. is a clinical stage gene editing company dedicated to improving life (DTIL) with its novel and proprietary ARCUS<sup>®</sup> genome editing platform that differs from other technologies in the way it cuts, its smaller size, and its simpler structure. These features are intended for ARCUS nucleases to drive more defined therapeutic outcomes. Using ARCUS, the Company's pipeline is comprised of clinical stage *in vivo* gene editing candidates designed to deliver lasting cures for the broadest range of genetic and infectious diseases where no adequate treatments exist. For more information about Precision BioSciences, please visit [www.precisionbiosciences.com](http://www.precisionbiosciences.com).

The ARCUS<sup>®</sup> platform is being used to develop *in vivo* gene editing therapies for sophisticated gene edits, including gene elimination (removing a genome e.g. viral DNA such as in the Company's PBGENE-HBV program), and excision (removing a large portion of a defective gene by delivering two ARCUS nucleases in a single AAV such as in the Company's PBGENE-DMD program) and gene insertion (inserting DNA into gene to cause expression/add function).
